

### **It starts with us!**

The countdown of a rocket is one of the most nerve wrecking moments of any launch. 3, 2, 1, Ignition! Satellites are launched which contribute to all humanity by delivering services for navigation, telecommunication, space exploration and environmental research. APP is the leading manufacturer of ignition systems for European Launchers. In our facility we develop, manufacture, and test gas generators for ignition, de-orbit or deployment applications in space. When we look to the sky, we see possibilities. APP is a space enabler, but we love earth. We are a people company and we are here to provide a better and safer future for mankind. Based on our space expertise we have developed safety and emergency applications, so that your beloved ones can return at home, every day.

### **Ready for your launch?**

Are you ready to take your next step and to support our multi-disciplinary teams? Designing on the edge from what is possible: extreme cold, heat, pressures and functioning within milliseconds? Can you deliver innovative ideas in order to answer to the questions from the markets of tomorrow? If yes, a job as Project Manager at APP is the perfect launch of your career.

## **Project Manager (m/f/x)**

### **Job description**

As a project manager you will have the full responsibility for the development, manufacturing and supply of rocket igniters. You will lead the production of rocket igniters to be delivered to this customer on time, on quality and on cost. And you will coordinate new product developments for this customer, constantly improving our products and production processes. With your continuous improvement mind-set, you constantly improve yourself and others. Good planning and organization are obvious to you, collaboration is your approach to have all teams and team members work towards the overall result. You are able to communicate on the customer level and to convert their wishes into new opportunities.

### **Education**

Technical University Masters or Bachelor, for example in Mechanical Engineering or Aerospace Engineering

### **Am I the right person?**

We are looking for a candidate who has an enthusiastic and positive personality. The right candidate has strong communication skills and knows how to motivate others. Besides this you have the following capabilities:

- Independent working attitude with a lot of initiative, perseverance and vision
- Motivated, flexible and the ability to reflect
- Persuasion, decisive and result driven with a strategic view
- Good communication skills in English (written / orally), Dutch is preferred

The right capabilities and mind set are crucial in our selection process.

**What do we offer?**

We offer a pleasant working atmosphere in a SME (awarded as one of the most innovative Dutch SME in 2013) with good employee benefits. A profit sharing settlement, flexible working hours and a free pension plan are part of the package. Benchmarks show that we offer a competitive salary.

Would you like to work in an innovative and growing organisation and do you recognize yourself in this profile? Then please send an e-mail including motivation and CV to the address below. For further information concerning the work content, the function and the organisation APP, you may contact:
